ID: 870 8488 3340

### ABSTRACT:

What can birdcages, invisible knapsacks, model prisons, and traffic intersections tell us about sexist oppression? How is sexism connected to racism, classism, homophobia, transphobia, and other forms of oppression? Is it nature or nurture that's responsible for our gender roles and identities? Who counts as a woman, and who gets to decide?

Tackling these questions and more, Professor Carol Hay presents the philosophy behind the feminist movement.
